Whether You're an Owner, Developer, or Contractor the FREE **BuildingClean.org** Website Can Be One of Your Most Valuable Building Tools

At a New York project, builders now purchase healthier paints for their workers and residents. The no-VOC paint is Cradle to Cradle certified and LBC Red List Free for **just \$28/gallon**, and is made in Johnstown, N.Y.

A builder switched to using whole-house energy recovery ventilators (ERV) made in Wisconsin that are **more efficient and \$100 cheaper** than the foreign-made ERV they had just installed, and the team preferred the ease of the filter access too.

A charitable builder found a U.S. manufacturer of comparably priced ventilation products to replace previously donated units from a foreign producer and is happier with their performance.

BuildingClean.org helped an affordable housing builder expand its green focus to include lower water use by helping them find cost-competitive faucets that are Made in the U.S. and certified for efficiency with WaterSense.

Building Clean helped one builder switch from using spray foam insulation to American-made, formaldehyde-free GreenGuard certified mineral wool batt insulation, while achieving the same amount of insulation (R-value) and **saving them \$3,250 per home.**

Using BuildingClean.org, charity builders connected with a local business 75 miles away that manufactures windows using **95% in-state materials**. They negotiated a deal and got **30% off** well-built and more efficient ENERGY STAR windows.

Another non-profit builder switched to water-efficient WaterSense elongated toilets made in Ohio **for less than \$5.**

An affordable homes builder **saved \$200-\$300** per unit on a combo washer/dryer by going with a manufacturer just **300 miles away** instead of an ocean away.

▶ A builder of homes for homeless veterans previously bought foreign manufactured vinyl (LVP) flooring, but with BuildingClean.org they switched to **U.S. made, phthalate-free LVP** at **\$0.60 less** per square foot.

▶ Building Clean helped a builder **save \$300** by switching to a union-made heat pump hot water heater that is manufactured 400 miles away and is more efficient than the heat pump hot water heater they planned to install.

When switching from basic asphalt shingles to Energy Star qualified asphalt shingles, a builder **saved \$1 per bundle** in material costs.

Building Clean offers free assistance to non-profit affordable housing organizations to help build healthier and energy-efficient affordable housing with American-made building products.
